## Description of error:

Following publication of this article, an error was identified on page 89. During production, an author proofreading correction was inadvertently omitted from the final published version.

The published text stated:

"The MoCA-J identifies MCI in participants with a score of 26 points or more, whereas 25 points or less indicates a normal cognitive range (sensitivity, 93%; specificity, 87%)."

The text should have read:

"The MoCA-J identifies MCI in participants with a score of 25 points or less, whereas 26 points or more indicates a normal cognitive range (sensitivity, 93%; specificity, 87%)."

The article has been corrected to reflect the intended wording.
